

How to Clean the Cappuccinatore

<p>1) Remove the cappuccinatore from the machine by holding down the small buttons on each side and pulling it out of the machine.</p>	
<p>2) Remove the clear tube</p>	
<p>3) Remove the black ring from the cappuccinatore</p>	
<p>4) Turn and lift the top cover plate and remove it from the rest of the cappuccinatore</p>	
<p>5) Remove the valve from the cappuccinatore</p>	
<p>6) Remove the clear suction tube joint</p>	
<p>7) Place all 5 parts of the cappuccinatore and the clear tube in a bowl of water with 1 capful of milk cleaning solution (about 5 – 10 ml). Allow to soak for at least 30 minutes, preferably overnight. Ensure all milk deposits are removed (use a small brush or end of a plastic fork to scrape any deposits).</p>	
<p>8) Rinse all parts under cold running water and reassemble in reverse order (steps 6 to 1 above)</p>
