

## Machine Care for Saeco Aulika Focus/Saeco One Touch

### Cappuccinatore/Autofrother Care

#### DAILY:

1. Place the clear plastic tube in a cup of clean water and an empty cup under the dispenser.
2. Press the “Clean” button (38) and OK (35) and follow instructions on display.

#### WEEKLY:

1. Press and hold the menu button (33)
2. Select “Machine Menu” and press OK.
3. Scroll to “Maintenance” and press OK.
4. Select “Cappuccinatore Clean” and press OK.
5. Follow on screen instructions using Milk Cleaning Solution.

#### FORTNIGHTLY:

1. Dismantle the cappuccinatore and place all 5 parts in a small bowl of clean water (see instructions for dismantling).
2. Pour half a cap of Milk Cleaning Solution into the bowl and leave 2 – 3 hours (or overnight)
3. Rinse thoroughly before drying and putting back together.
4. Insert back in the machine.

### Brew Unit & Machine Exterior

#### WEEKLY:

1. Remove the **drip tray (8)** and **dreg drawer (7)**.
2. Open the door on the right side of the machine (10).
3. Remove the **brew unit** by pressing down on the handle and pulling it out (9).
4. Remove the black plastic tray underneath brew unit.
5. With all removable parts out of the machine, wipe away any coffee grinds left in the base of the machine.
6. Empty and rinse the brew unit and brew unit tray under **cold** running water. Dry the top part of the brew unit with paper towel before re-inserting the tray and brew unit back in the machine.
7. The brew unit should slide easily along the track on the brew unit tray – do **NOT** use force to insert the brew unit, it will damage the machine
8. Wipe down the exterior of the machine with a clean, damp cloth (no detergent or abrasive cleaning agents required)
